Duties

Duties

As a IT SPECIALIST (NETWORK), GS-2210-7/9/11, duties include:

1. Administers the base Local Area Network (LAN). Implements new network operating systems hardware and software and develops base wide network operating procedures. Analyzes LAN utilization statistics through data collection and performance measures to ensure the smooth, reliable, and robust operation of LANs to include classified and unclassified networks. Coordinates LAN installation, maintenance, troubleshooting, and reviews, evaluates, and finetunes components such as virtual servers, hubs, switches, and routers to achieve peak efficiency within the overall network connectivity. Assists in the development, configuration, installation, and maintenance of network systems to include the LAN/WAN. Receives network, communications, and related operating systems from various sources such as design centers and commercial vendors. Maintains an inventory of all network hardware and software. Installs, configures, and troubleshoots network and application server hardware, network operating system software, and peripheral network equipment such as routers, bridges, cabling system, network interface cards, modems, multiplexers, and concentrators. Develops and maintains base wide procedures for networks, system operations, backups, and product assembly and installation. Implements network operating system and/or network application software, and maintain contact with software suppliers to ensure that current releases of software products are in use. Conducts testing of network systems to ensure current network software products are compatible with system configurations and to ensure operability, efficiency, and compliance with existing standards. Monitors operation of the LAN/WAN and ensures hardware and network operating software are functioning properly and that operation standards are met. Function tests systems components to identify and resolve technical problems, analyze system malfunctions, implement necessary corrective actions, and provide ongoing support for the resolution of complex problems and operating malfunctions. Performs system backups to ensure expedient restoration of the database for the respective network equipment. Assists customers on the use of office automation computers, local and wide area networks, and other automated tools. Ensures backups of network equipment configuration data are current. Resolves LAN related problems for the base. Recommends and prepares operating policies and procedures for networks, system operations, and product assembly and installation. Provides customer assistance and training for new network systems.

2. Conducts problem analysis to identify trends, ineffective practices or procedures, and equipment shortcomings. Identifies and documents network requirements for specific needs of customers. Determines if the facility environment can provide for network system requirements, and if infrastructure is in place to support the system. Conducts in-depth analyses of network usage, user complaints, traffic interruptions, hardware and software capabilities, and other relevant factors. Changes the components of existing equipment for efficient operation or recommends major modifications to existing systems. Recommends methods and procedures and coordinates corrective action to optimize utilization of present equipment. Uses benchmarks, performance measurement, and evaluation data, in conjunction with modeling and simulation techniques in planning for increased capacity and to support additional workloads. Identifies potential performance or capacity problems and plans for changes to avert problems. Works with technical support personnel in resolving problems. When required, participates with design team on new initiatives, contributing technical expertise on existing LANs. Ensures upgrades to the base infrastructure are identified and submits requests for equipment and funds. Cooperates and works with base communication agencies in planning and developing new or additional network infrastructure capabilities. Provides cost analyses for new and upgraded network infrastructure capabilities.

3. Adheres to management control plan requirements by conducting self inspection and staff assistance visits. Resolves identified discrepancies.

4. Performs other duties as assigned.
